50X1-HUM 5. Hotor vehicles seen at the headquarters on Friedrich Ebertstrasse 50X1-HUM Intent T-34/05 tanks were unloaded by 6 efficers and about 35 EL at the Stendal railroad station on 22 August. After being unloaded, the tanks went toward the Albrecht der Baer Kaserne. Until 3 September, most of the Soviet troops in Stendal were at the post. Tactical walks by officers north and east of Stendal were conducted during the time covered by the report. Soviet troops held a night exercise during the night of 29 August. On 29 August, Unit 50X1-HUM received a railroad carload of ammunition from Schoenebeck. The ammunition was unloaded. \* Comment. According to the information, most of the elements of the 207th Itz Rifle Div and of the LXXIX Mtz Rifle Corps seemed to have been 50X1-HUM at the post until the beginning of September but individual components are believed to be still rotated for practice at Letzling Heath.

Compared with the last report of early August 1951 50X1-HUM the present report indicates no substantial changes
